Abstract:

This paper aims to promote the advantages which provided by public-private partnership (PPP) within the Covid-19 circumstance. With more vaccines coming in and the circumstance getting stable, we would recommend the MOH to take a step back, review the situation, and promote public-private partnership (PPP) to prepare a platform for long-term development of the whole health sector. The research applied qualitative method as SWOT analysis to point out factors which might effect on the long-term development of the whole sector. As a result, the findings of this paper certified that the crucial existence of PPP once public health agency could not well manage the vaccination issue.

Keywords: covid-19, health sector, public-private partnership.
